FEATURED PRODUCT

8820 Valve Body with no inlet adapter, no outlet adapter, ready for R1 handle

Product code: 88200003

Availability: Available

Applications: Fire OEMs

Overview

Self-locking heavy-duty valve with a stainless steel ball designed for the harsh realities of today's fire service when water contaminants challenge a valve's sealing capabilities. Apparatus valves like this one feature the following:
- A single valve body that will accept a variety of actuators
- HydroMax TM technology: A patented ball geometry providing performance never seen before in swing-out valves

Actuator options:
- R1
- TS/TSC

Actuator/handle and adapters not included in price.

Find a distributor near you if you're interested in these apparatus valves.

Features

- 2" waterway
- Self-Locking valve
- 316 stainless steel ball with Hydromax technology
- High quality brass body
- Improve sealing & increased gating ability
- Flow optimization reduces turbulence while in the gated position and requires lower operating forces
- No lubrication or regular maintenance required
- Simple two-seated design (no O-Rings to cut or lose during assembly or maintenance)
- Wide range of available adapters
- Designed and tested to exceed NFPA requirements
- Cast, machined and assembled at our facilities in Wooster, Ohio

Actuator options:
- R1
- TS/TSC

Adapters specified separately. See valve guide for complete list of available adapters.

Actuator/handle and adapters not included in price.
